Starsage Dunnage Air Bags

Our Dunnage Air Bags can be used to stabilize, secure, and protect cargo during all sorts of transportation. Dunnage Air Bags are placed in the void gap between the cargo. Dunnage Air Bags are made out of two components; an inner component that consists of a polyethylene inner bag, the outer component is a paper bag. Our Dunnage Air Bags are easier to handle & exceptionally lesser weight. The quantity of inflation air may be varied in accordance with the particular properties and requirements of the package contents.

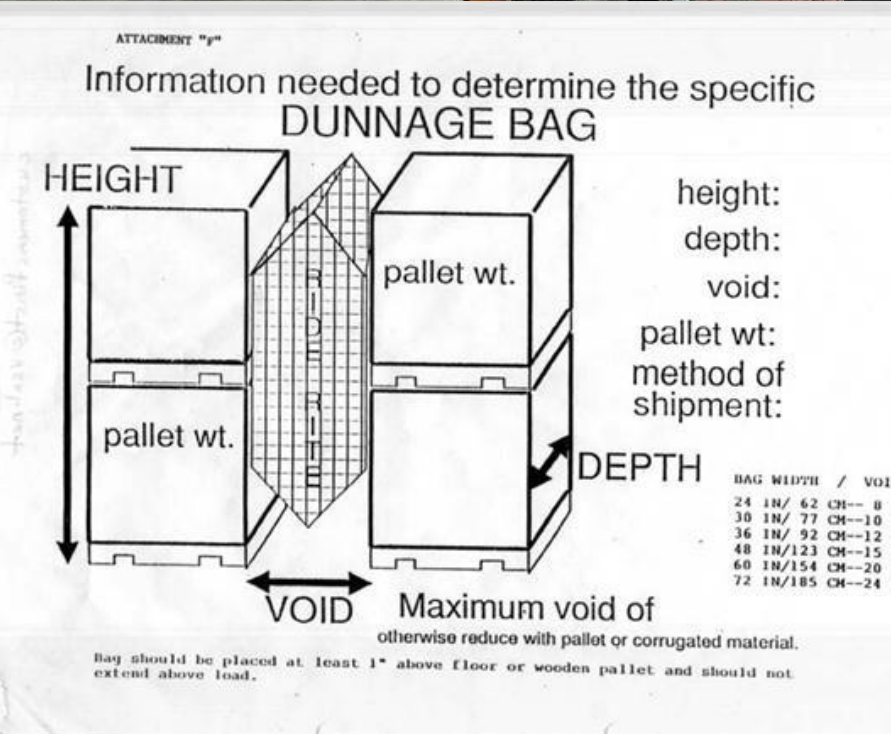

We also provide Dunnage Air Bags in different sizes and shapes to fit our customer requirements.
